

CLAIM AMENDMENTS

Claim 7 (Currently Amended)

A process for making a dried, porous, flake-shaped, uncomplexed agglomerated modified cyclodextrin product comprising

drying an aqueous solution of uncomplexed modified cyclodextrin on a drum dryer, wherein the aqueous solution has a solids content of between about 5 to about 70% by weight; and

recovering a dried, porous, flake-shaped, uncomplexed agglomerated modified cyclodextrin product having a particle distribution of about 90% or more by weight of said product less than or equal to about 200 microns, and about 50% or more by weight of said product greater than or equal to about 20 microns, and wherein said product has a dissolution time in water less than about 5 minutes at 75°F and 10% solids.

Claim 8 (Previously Presented)

The process of claim 7 wherein said cyclodextrin is a hydroxypropylated beta-cyclodextrin.

Claim 9 (Previously Presented)

The process of claim 7 wherein said drum dryer has steam-heated drums rotated at about 1 to about 5 revolutions per minute.

Claim 10 (Previously Presented)

The process of claim 9 wherein said drums are heated with steam at a pressure of about 100 psig.

Claims 11-19 (Cancelled)
